Source: Insight Investment and Rimes. Fund performance is shown for share class B € Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for 3 Month Euribor. Benchmark used is the shareclass currency equivalent of SONIA. Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

FUND MANAGER COMMENTS

The Fund outperformed its cash benchmark in April. Risk assets were subdued during the month, due to low market volatility. European structured credit continued to perform well. UK residential mortgage-backed securities outperformed the rest of the sector, while European collateralised loan obligations (CLOs) performed more strongly than their US counterparts. April saw sustained issuance across several countries and sectors, owing to a recovery in capital market conditions. Technicals also remained robust. US structured credit also posted gains across all sectors. Over the month, the subprime automotive and unsecured consumer sectors outperformed, as delinquencies and losses stabilised. April was quiet on the lending side. During the month, CLOs outperformed other credit instruments and contributed most strongly to performance. We allowed cash to build and were opportunistic in our purchases.
