Source: Insight Investment and Rimes. Fund performance is shown for share class A £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for SONIA (previously benchmarked against 3-Month GBP LIBOR until 31st December 2020). Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

FUND MANAGER COMMENTS

The Fund underperformed its cash benchmark in April. Risk assets succumbed to a severe sell-off, due to tariff announcements. Sentiment improved after reciprocal tariffs were paused. European structured credit had a challenging month. Higher beta classes, including mezzanine residential mortgage-backed securities (MBS), commercial MBS and collateralised loan obligations (CLOs) underperformed, while higher credit assets acted as a relative safe haven. US structured credit was also affected by the market turbulence. Issuance was subdued before picking up towards the end of April to reach levels below historical averages. AAA rated spreads widened by 20-30bp, while less liquid sectors saw spreads widen by 50-100bp before they slowly retraced. The Fund was active in BBB rated CLOs due to higher yields and in AAA rated non-qualified residential MBS. Performance was driven by broad-based declines across the portfolio, which were offset by carry.
