Source: Insight Investment and Rimes. Fund performance is shown for share class A £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for SONIA (previously benchmarked against 3-Month GBP LIBOR until 31st December 2020). Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

## FUND MANAGER COMMENTS

The Fund outperformed its cash benchmark in April. Risk assets sold off due to persistent inflation. In contrast, European structured credit performed reasonably well. Despite historically elevated valuations, relative value versus corporate credit remains inexpensive. Absolute yields in BBB-rated collateralised loan obligations appear attractive. The month saw robust issuance from several sectors and jurisdictions, particularly in Australian residential mortgage-backed securities and Spanish consumer asset-backed securities (ABS). US structured credit was more mixed. Primary issuance was robust and demand was strong, as most deals were oversubscribed across the stack. Spreads within prime automotive tightened, while those in the subprime space widened. Rental car ABS underperformed. Consumer delinquencies continue to rise but at a slower pace. ABS are insulated from further deterioration. April was quiet on the new lending side. Performance was driven by carry.

Weighted Average Discount Margin (Assets) vs Sonia (bp)	488
Weighted Average Discount Margin (Fund) vs Sonia (bp)	413

## CREDIT RATING

The credit rating breakdown above includes two AA-rated securities issued by Cubitt Global LLC and is based upon the rating from an external credit rating agency. In a recent release, the external credit rating agency noted that they have placed five transactions from that issuer "Under review with negative implications" that may result in a material downgrade or a withdrawal of the public rating. Insight's internal credit rating of these assets has been and is materially lower than that of the external agency and the valuation of the underlying assets reflects this.
