Source: Insight Investment and Rimes. All performance is annualised. Fund performance is shown for share class 7. Fund performance is calculated in Euros as total return, including reinvested income, gross of fees and expenses. Past performance is not indicative of future results. Investment in any strategy involves a risk of loss which may partly be due to exchange rate fluctuations. Any gross of fees performance does not include fees and charges and these can have a material detrimental effect on the performance of an investment. Please note: data is provisional and may change. Investors must read all performance information alongside the full performance information in the KIID.

FUND MANAGER COMMENTS

The European Central Bank cut the deposit facility rate by 25 basis points to 3.5% mid-September as confidence has grown that inflation is under control and falling. Sequential GDP growth in the second quarter was downgraded by 10 basis points to 0.2% in a final reading. The Manufacturing Purchasing Managers' Index declined from 45.8 in August to 45.0 in September. In markets, 1-month EURIBOR fell from 3.59% to 3.35%, while the 3-month rate declined from 3.49% to 3.28%. We bought certificates of deposit and commercial paper from OKB and KBC. We bought bonds and floating-rate notes from National Australia Bank. While the inflation outlook appears positive, selective term investments were favoured. Positioning will be determined by central bank meetings. The weighted average maturity of the Fund was 34 days at the end of August and 41 days at the end of September.
