Source: Insight Investment and Rimes. All performance is annualised. Fund performance is shown for share class 3 and is calculated in US dollars as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for EFR (previously 7-day USD LIBID until 1st October 2020). Past performance is not a guide to future performance. Please note the value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. Please note: data is provisional and may change. Investors must read all performance information alongside the full performance information in the KIID.

FUND MANAGER COMMENTS

US annual inflation rose declined from 3.5% in March to 3.4% in April. The US Federal Reserve left the target range for the federal funds rate unchanged at 5.25-5.50%. The economy's first-quarter annualised growth rate was revised 30 basis points lower to 1.3%. The Manufacturing Purchasing Managers' Index rose from 50.0 in April to 51.3 in May. In markets, the Secured Overnight Financing Rate remained at 5.34%. We bought certificates of deposit and commercial paper from TD Bank. While the inflation outlook appears positive and investors are pricing in no further rate hikes, selective term investments were favoured. Positioning will be determined by upcoming central bank meetings. The weighted average maturity of the Fund was 20 days at the end of April and 24 days at the end of May.
