Source: Insight Investment and Rimes. Fund performance is shown for share class S £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for 1-month SONIA (previously 3-Month GBP LIBOR until 1st January 2020). Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. Investors must read all performance information alongside the full performance information in the KIID.

FUND MANAGER COMMENTS

The Fund outperformed its cash benchmark in August, ending with a running yield of 98bp ahead of one-month SONIA and a 99% weighting to AAA-rated assets. Risk assets declined during the month, due to rising bond yields, persistent inflation, elevated commodity prices and the anticipation of rates remaining higher for longer. European structured credit enjoyed a positive month, as a persistently tight technical backdrop and a less pessimistic economic outlook allowed collateralised loan obligations to perform strongly. Spreads tightened most in the UK and Australian residential mortgage-backed securities, as August saw a lack of issuance. However, we anticipate a busy new issue calendar in September. US structured credit also moved higher, against relatively low supply. Spreads across most sectors tightened, with the strongest performance coming from prime and subprime BBB-rated automotive loans. As issuance picks up, we will take advantage of opportunities where we see relative value.
